

# AM Ultra Width Detection Range EAS System

The AM ultra width detection range EAS system is stable and perfect performance without false alarm. It is auto-adjust detection range if there is interference in the shop. One master antenna works independently as mono mode, or works with one slave antenna as mono or dual mode.

- Advanced DSP+FPGA technology, auto adjust circuit design;
- Unique label identification program;
- Support remote control with multi-functional tuning interface software;
- Large detecting range cover, reduce the project cost;
- Low false alarm, strong anti-interference ability, perfect performance on site.

## Specification

### Outline Dimension

1610 x 440 x 150mm

### Mono Detection Range (Each Side)

DR label : 2x0.85m;  
AM pencil tag : 2x1.4m

### Dual detection range

DR label : 1.7m;  
AM pencil tag : 2.8m

### Net Weight

11kg

### Material

ABS

## Parameters

### Input Voltage

220v AC 10% 50Hz/60Hz

### Power

≤25w

### Working Frequency

SBKHZ

### Alarm Way

acousto-optic alarm

### Function

Loss prevention antitheft alarm  
security system for retail shops

### Packing Detail

1pc/ctn, 165 x 52 x 15cm, 12kg

## Application

- Clothing shop
- Electronic store
- Pharmacy
- Cosmetic shop
